

**TO ALL RIVERWALK – DIAMOND, EMERALD,  
AND AMBER OCCUPANTS**

**NOTICE OF EXTERIOR TESTING**

Please note that the Associations' expert has scheduled intrusive/destructive testing of the exterior of your buildings during the week of August 18, 2008, beginning at 8:00 a.m. each day throughout the week.

A contractor will carefully cut into certain exterior areas of the building(s), removing layers of the building façade. Each area will be repaired following documentation. All repairs will be made in a manner identical to the original construction. Homeowners do not need to be home; however, if you are home during the testing, you can expect ladders, contractors and engineers at exterior doors, windows and on roofs. Typical construction noises (hammers, saws, etc.) will occur.

We will be scheduling interior testing in specific units at a later time.

We apologize for any inconvenience this testing may cause you.
